CNC DIVISION

G2 Genesis Router

CNC ROUTER model G2 Genesis Router with Syntec PC-Based controller in standard configurations.

The Anderson Router Spindel is equipped with maintenance free ceramic bearings, is grease lubricated and air cooled for longer bearing life. Router motor is powered by an electronic AC inverter drive system.

Router is equipped with a 10 HP Becker vacuum pump with 250 cubic meters /hour. This table and pump combination will allow a wide range of flexibility in holding large and small work pieces for safe parts processing.

Please call for pricing, finance or lease details.

WOODWORKING MACHINERY, ACCESSORIES & SERVICES

A company is judged by the company it keeps...

ACEWOODLLC.COM P. 608.222.6251 F. 800.536.4682

...and we keep the finest.
